Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Claims 11-12, 14-35 are pending.

Double Patenting

2. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 14-35 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 12-33 of prior U.S. Patent No. 6,298,481. This is a double patenting rejection.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an

international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 11-12 are rejected under 35 U.S.C. 102(e) as being anticipated by Kosaka et al, U.S. Patent No. 6,298,481.

As per claim 11, Kosaka et al discloses

A method for providing run-time modification of functionality in an executable computer program that has a substitute reference address for one or more symbolic references used in a source code version of the executable computer program (abstract, and col. 4 lines 8-14, "...a runtime approach for dynamically inserting a function into an existing application executable..."),

the method executing on a computer system, the computer system including a processor and storage device (Fig. 3),

loading the executable computer program into the computer system, loading a module that includes an item definition into the computer system (Fig. 5, "run existing application executable")

and executing a process to associate the substitute reference address with the item definition (col. 8 lines 20-43, "redirection stub")

wherein a pointer associated with the substitute reference address is modified to point to the item (Fig. 6 and Fig. 7, col. 8 lines 20-43, "redirection stub").

As per claim 12, Kosaka et al discloses

associating the substitute reference with the item definition by executing script language instructions (Fig. 6 and Fig. 7 and col. 8 lines 20-43).
